

**I Enroll**

Paperless Processing!

Single View Across Facilities!

Centralized Document Management!

Intuitive and Easy To Use!

Better Provider Relations!

Improved Data Quality and Compliance!

## Transform Provider Management into one streamlined process with I-Enroll

### One Platform. One Solution. Faster On-Boarding.

#### TIME FOR CHANGE

Provider on-boarding has remained slow, painful, and costly for most healthcare organizations for years. Two contributing factors as to why this is

- 1) Many organizations continue to rely on siloed departmental solutions that are still manually intensive and overly paper based
- 2) The vendor landscape has remained relatively static with respect to designs, usability and difficulty interfacing with other systems.

#### ENTER I-ENROLL

I-Enroll is architected as a completely web based enterprise solution that delivers transformational capabilities to small and large organizations by driving efficiency and cost effectiveness throughout the entire Provider On-boarding process.

#### INCREASE REVENUES

I-Enroll dramatically reduces the time it takes to onboard Providers to get them billable sooner than later. I-Enroll also provides organizations with the

ability to proactively identify potential bottlenecks in its processes. Managing and prioritizing workloads more effectively also mitigates risk to revenue.

#### REDUCE EXPENSES

Processes that are efficient, well integrated and easier to monitor are more reliable and predictable.

I-Enroll automates many manually intensive and paper laden tasks to eliminate redundant efforts and better align outcomes across departments and facilities.

- Paperless Processing
- Centralized Document Management
- HIPAA security and privacy standards
- Auto Expiry Notifications
- Built-in Workflow and E-Notifications
- NPIs validation against NPDES
- Three levels of configurable audits to enforce data quality and completeness
- Seamless integration to third party verification services
- Automatic retrieval of NPDB Provider data
- Automated checklists to eliminate manual tracking of verification attempts
- Pre-populated Payor Enrollment Forms
- Automatically generates delegated credentialing feeds (in Excel or CSV)
- Proactive tracking of PAR Numbers and Re-credentialing cycle of each Payor
- Supports multiple facilities and locations
- Secure access to Providers, Practice Staff and Credentialing Committee
